THE BEST NEW GUNS AND GEAR HITTING THE MARKET

ALAMO PRECISION RIFLES APR G2 ACTION

→ A collaboration between Alamo Precision Rifles and Thompson Leh, the APR G2 action has several features previously reserved for custom high-end models while still being very affordable. This Remington-700-style action uses a fluted, one-piece bolt with a mechanical ejector and a double-pinned recoil lug. Upgrades include 1-1/16x20-tpi threads, wire-EDM raceways for smoother cycling, a pinned 20-MOA rail and a smaller ejection port for rigidity. The entire action has a DLC finish. (aprifles.com)

BARNES PRECISION MATCH AMMO

→ Barnes is now offering 6mm Creedmoor, 6.5 Creedmoor and .260 Remington loads in its Precision Match lineup. This series is engineered for precision at extreme distances with exceptionally low standard deviations due to Barnes' exacting manufacturing and quality standards. Precision Match rounds are loaded with Open-Tip Match (OTM) projectiles featuring long boat tails and high ballistic coefficients (BCs). As a bonus, you can scan the QR code on the back of each box to view Doppler-radar-generated drop tables specific to each load. (barnesbullets.com)

CRIMSON TRACE SCOPES

→ While it might be known for its light and laser accessories, Crimson Trace recently dove into the optics world by releasing 11 new riflescopes for tactical, long-range, hunting and recreational firearms enthusiasts. The scopes range from a 1-4x24mm model in the sporting line to a 5-25x56mm long-range tactical riflescope, and numerous first-focal-plane reticles are available. Each scope is fog-, shock-, water- and dust-proof with fully multi-coated Japanese glass, lens caps and durable housings. (crimsontrace.com)

COMP-TAC EVADE HOLSTER

→ The eVade is an appendix inside-the-waistband (AIWB) holster that is designed for casual EDC as well as deep-concealment applications. The eVade's holster body is made of Kydex for comfortable wear and a smooth draw. The rig attaches to your belt with a tuckable nylon clip that holds strong without snagging or damaging your clothing. The eVade also has the Comp-Tac Kick, an attachment that provides pressure against the belt to push the pistol grip inward and minimize printing. (comp-tac.com)

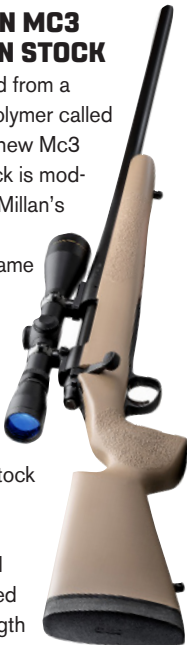

MAGPUL LIGHT INSULATED HYBRID

→ The Magpul Light Insulated Hybrid pullover is designed to be an asset during cold-weather shooting activities, not a hindrance. With an insulated upper torso and arms paired to a stretch nylon lower torso, it is warm and dynamic in the right areas and moves the way your body does. Designed to work with chest rigs, binocular harnesses, CSAR chest packs and waist belts, the Light Insulated Hybrid keeps you warm, fights off moisture, dries fast and works with your equipment. (magpul.com)

MCMILLAN MC3 TRADITION STOCK

→ Formulated from a proprietary polymer called Zenolite, the new Mc3 Tradition Stock is modeled after McMillan's best-selling model, the Game Scout, and is compatible with most short- and long-action Remington 700s. Each stock has a hinged floorplate, a molded barrel channel, a fixed 13.5-inch length of pull, a 1-inch Pachmayr recoil pad, two front sling studs and one rear stud. Tan, olive and carbon-fiber black versions are available. (mc3stocks.com)

MOSSBERG RETROGRADE SERIES

→ Designed to commemorate Mossberg's 100th anniversary in 2019, the Retrograde Series features the two most iconic police and military pump-action shotguns built to today's standards, but with the retro look and feel of a walnut stock and matching corncob forend. The Mossberg 500 Persuader Retrograde has an 18.5-inch barrel, a six-shot magazine tube, a blued finish and a front brass bead sight. The 590A1 Retrograde has a heavy 20-inch barrel, a nine-shot magazine tube, a heat shield, a bayonet lug, ghost-ring sights and a Parkerized finish. (mossberg.com)

REMINGTON PREMIER EXPANDER SLUGS

→ Remington's new 12- and 20-gauge Premier Expander Sabot Slug loads feature Barnes' all-copper-tipped Expander slugs that are precisely engineered with six cutting petals that deploy on impact to inflict enormous terminal damage and pass-through penetration to drop game instantly. Both 2¾- and 3-inch shells are available. (remington.com)

SHIELD RMS-W SIGHT

→ Shield has unveiled a new red-dot sight that is a water-resistant and ruggedized version of the RMS line. Available with a 4- or 8-MOA dot, the RMS-W is gasket sealed to create a watertight fit between the slide and battery compartment without needing a special mounting plate. When properly mounted, the sight will remain watertight down to 20 meters for 30 minutes. The RMS-W also features a newly designed housing and hard-coated polymer lens. These modifications increase the model's flex strength by 80 percent. (shieldpsd.com)

STEINER PREDATOR AF BINOCULARS

→ Steiner's new Predator AF line features autofocus and Color Adjusted Transmission (CAT) lens coating technology. In essence, with these binoculars, everything is always in focus, eliminating the need for a center focus wheel and the hassle of chasing focus through thick cover, low light or moving objects. Dual diopter adjustment rings allow precise tuning and advanced Porro prisms provide clear, in-focus viewing from 20 yards to infinity. Both the 19-ounce 8x30mm model and the 30.3-ounce 10x42mm model are easy to pack. (steiner-optics.com)

SUREFIRE X400 ULTRA

→ The SureFire X400 Ultra produces 1,000 lumens of stunning white light focused by a Total Internal Reflection (TIR) lens for a tight beam with extended reach and significant surrounding light for peripheral vision. Below the light is a red or green laser that is perfect for low-light scenarios and non-standard shooting positions. The laser's aiming adjustment mechanism uses Nylok screws that won't back out from the effects of recoil, which means it rarely needs to be re-zeroed. The X400 Ultra is activated via an ambidextrous switch at the rear for one-finger control. (surefire.com)

VEDDER LEATHER GUN BELT

→ While Vedder Holsters is known for its Kydex IWB, OWB and pocket holsters as well as the Cobra Quick Release Gun Belt, the company is now offering a leather gun belt. This new 1.5-inch-wide belt is sleek and stylish enough for the boardroom while being rugged enough for the ranch. The elegantly designed, matte-finished gunmetal bucket has a high-end look, and the belt is made from double-layered premium cowhide that is reinforced with a solid polymer core to provide an extra-stiff foundation for your EDC rig without being bulky.
